

Texas A&M University
Student Engineers' Council

2021-2022 Overview Information

Career Fair

The SEC Engineering Career Fair is the premier recruiting event for the College of Engineering at Texas A&M University. The Career Fair is planned, organized, and staffed by the Student Engineers' Council and is one of the largest student-run career fairs in the nation. Historically, as many as 10,000 engineering students attend the Career Fair seeking internships, co-ops, and full-time positions from the 400+ companies that attend.

Directed Internship

As part of SEC's commitment to fostering the professional development of engineering students, a 6-week summer program was established to expose Texas A&M engineering students to real-world problems via industry partnerships. This Directed Internship program is intended to provide students a tangible experience whilst affording companies an opportunity to both identify prospective talent and benefit from an outside perspective.

Engineers' Week

Engineers' Week is a national event started in 1951 that the Student Engineers' Council celebrates at Texas A&M University. The purpose of this event is to promote engineering awareness, ensure the well-being of students within the college, and celebrate the accomplishments of all engineers.

EnVision

EnVision is an event hosted annually by the Texas A&M Student Engineers' Council that serves to foster an engineering mindset in K-12 students who are interested in this field. The conference hosts several design competitions for each age group, as well as a pre-built team design competition offered to high school teams only. The competitions are developed through partnerships with Texas A&M engineering societies and feature a variety of engineering design challenges.

TREC

The Texas A&M Regional Engineering Conference (TREC) committee under the Student Engineers council hosts a design competition for engineering students at Texas A&M. During the kick-off, the teams will receive a problem statement in industry or the engineering profession. Over the course of two weeks, they will build prototypes to solve this problem, and present their projects at the judging event. The purpose of this conference is to foster professionalism and enhance their design skills and interdisciplinary collaboration by allowing students to address a real-world issue.

ProTrip

ProTrip is an annual professional networking trip to expose SEC members to engineering opportunities outside of the state of Texas. The trip provides students with the opportunity to experience different engineering industries, professional workplaces, and the culture of a major U.S. city. Previous cities include San Francisco, Washington D.C., and Dallas.
